All Unimark vertical preheaters are supplied with powerful hydraulic motor driven agitators, with the pump driven by electric start diesel engines. The base mounting allows easy fitting to any vehicle or trailer. The burner system is designed to give very fast heat up time and is controlled by our electronic gas management system

With thermostat, auto-ignition and flame-out protection. Economical in use with full wrap round insulation which also gives operator protection. Supplied as single or twin units ranging from 90 to 630 liters per single unit and with direct flame or indirect oil jacket heating. 12 V diesel oil burner systems can also be supplied if preferred.

Unimark operates on policy of continual research and development, therefore specifications can change without notice. The images are indicative.
